

2021 Healthy Kids Colorado Survey
MIDDLE SCHOOL PORTFOLIO

CENSORED SURVEY

2021 Frequently Asked Questions (FAQs) – For Parents/Guardians

What is the Healthy Kids Colorado Survey (HKCS)?

The survey collects anonymous information from students in 6th to 12th grades about health-related attitudes and behaviors, including: unintentional injuries and violence; mental health; school safety and physical fighting; tobacco and other substance use; physical activity and nutrition; sexual behaviors; basic demographic information such as age; and risk and protective factors. The survey is administered every two years to randomly selected schools. In 2019, about 100,000 students participated from over 500 middle and high schools.

How do Colorado communities benefit from HKCS data?

- Provide state and regional estimates of a wide range of youth health behaviors.
- Track trends in behaviors at state, regional, and local levels over time.
- Increase public awareness about health and behavior issues that impact youth.
- Provide support for healthier learning environments through school health education policies and programs.
- Educate leaders to shape effective public policy.
- Bring funding into our state and local communities.
- Inform program planning and grant applications.

Some grants that utilize HKCS data:

- Drug Free Communities (DFC)
- Communities that Care (CTC)
- Chronic Disease Prevention Grants
- School Health Professionals Grant
- Bullying Prevention and Education Grant
- Comprehensive Sexual Health Education Grant
- State and local health foundation grants

How will the HKCS benefit our school?

- Each school receives a report with its own results.
- Results can be used to support grant applications, needs assessments, and program planning to focus on prevention.

Is participation confidential?

Yes, for both students and schools! Students do not put their name on the survey. Teachers follow protocols to protect confidentiality while the survey is being completed, such as not walking around the classroom or assisting a student while completing the survey. Individual data are never released, only summaries of combined data. Participating schools are not identified in any public release information. Districts and schools may share information with existing coalitions or committees (i.e. school accountability teams) at their own discretion.

How long does the survey take?

A single class period, or typically about 45 minutes.

Why does the HKCS ask about sensitive topics (like sex or drugs)?

Information about these behaviors helps Colorado provide resources and education necessary to prevent unhealthy behaviors and promote healthy behaviors. Students who complete the survey are instructed beforehand that their answers are completely anonymous and that they may skip any questions they do not feel comfortable answering.

Can answering the survey questions influence students to try unhealthy behaviors?

There is no research evidence to suggest that health surveys influence youth behavior or experimentation in unhealthy behaviors. This holds true even after repeated administration of the questionnaire. It is reassuring to know that many health-related behaviors – including sexual behaviors, tobacco use, and some forms of violence – have declined since 1991, at the same time that youth survey activities have increased nationwide.

Can I see a copy of the survey?

Yes, there is a copy of the survey module(s) being administered online at www.HealthyKidsColo.org.

Do I need to give permission for the survey?

Districts may vary in their policies about survey consent, so contact your district for questions regarding parent/guardian permission. Colorado law requires informed parental/guardian consent for surveying youth in schools. The requirement is met when parents/guardians are informed that their student has been asked to participate in a survey and given the option to opt the child out of participation. There is a copy of the parent/guardian consent form available online at www.HealthyKidsColo.org. You should receive one if your child is in a selected classroom that will take the survey.

Does my child have to participate?

Participation in the survey is not required, but your child's participation is valuable in order to have high participation rates to obtain valid health information representing the whole student population in Colorado.

Can I see the HKCS results?

You may contact your school principal and request to see the results from them. Results will be shared with each school and district in the spring semester following an administration.

If I have any further questions, whom can I contact?

All additional questions or inquires can be sent via email to CSPHSurveyTeam@CUAnschutz.edu.

Parent/Guardian Information Letter

Healthy Kids Colorado Survey

Dear Parent or Guardian:

This fall some of our students will take the Healthy Kids Colorado Survey (HKCS). It is an important survey about student health and behavior. The survey will ask students about health topics including: exercise, diet, alcohol, tobacco, drug use, mental health, suicide, bullying, sexual behaviors, and how they have been affected by the COVID-19 pandemic. The survey also asks students about school-life, school safety, trusted adult relationships, and other things known to be connected with healthy choices.

Your child is in a class that has been chosen to take the survey. Students do not have to take this survey. The survey is optional and anonymous. It takes no longer than one class period to complete. The survey process will protect your student's privacy. No information is collected on the survey that can identify a student. Only your child will know how he or she answers the questions. Students do not get school credit for taking the survey, and there is no penalty for not taking the survey. Students who take the survey may choose not to answer any question.

The survey results will help state health agencies, your school, and community groups. The results will also help plan programs and services for youth. In order to get the most accurate information about youth health, we would like all students in selected classrooms to take part in the survey.

This survey was created in-part by the Centers for Disease Control and Prevention (CDC) and the Colorado Departments of Education (CDE), Human Services (CDHS), Public Safety (CDPS) and Public Health and Environment (CDPHE). These groups provide funding to the University of Colorado Anschutz Medical Campus to conduct the Healthy Kids Colorado Survey in schools biennially. This project has been approved by your school district and the Colorado Multiple Institutional Review Board (COMIRB).

Students will receive the survey during class time (either in-person or virtually) and are instructed to answer the questions or leave the survey blank. Students who are not completing the survey will do other schoolwork during the survey time. We encourage you to discuss the topic with your child and share your views on their choice to participate.

For more information about the study and to view a copy of the survey, please visit our website at <http://www.healthykidscolo.org> or call the Healthy Kids Colorado Survey Director, Dr. Ashley Brooks-Russell, at 303-724-8437. For questions regarding IRB approval, please contact COMIRB at 303-724-1055.

Please sign and return this form to your child's school within the next two weeks if you do NOT want your child to participate.

Carta de información para los padres o tutores Encuesta Healthy Kids Colorado

Estimado Padre o Tutor:

Este otoño, algunos de nuestros estudiantes tomarán la Encuesta Healthy Kids Colorado (HKCS). Esta es una encuesta importante sobre la salud y el comportamiento de los estudiantes. En la encuesta se les preguntará a los estudiantes sobre temas de salud incluyendo: ejercicio, dieta, alcohol, tabaco, uso de drogas, salud mental, suicidio, acoso escolar, y cómo han sido afectados por la pandemia del COVID-19. En la encuesta también se les preguntará a los estudiantes sobre la vida escolar, la seguridad de la escuela, relaciones de confianza con los adultos y otras cosas por estar relacionadas con opciones saludables.

Su hijo está en una clase que ha sido elegida para tomar la encuesta. Los estudiantes no tienen que tomar esta encuesta. La encuesta es opcional y anónima. No se necesita más de una clase para completarla. El proceso de la encuesta protegerá la privacidad de su estudiante. No se recopilará información sobre la encuesta que pueda identificar a un estudiante. Solo su niño sabrá cómo él o ella contestaron a las preguntas. Los estudiantes no recibirán crédito escolar por tomar la encuesta, y no hay ninguna penalidad por no tomar la encuesta. Los estudiantes que toman la encuesta pueden optar por no responder a ninguna pregunta.

Los resultados de la encuesta ayudarán a las agencias estatales de salud, su escuela y los grupos comunitarios particularmente en comprender los efectos del COVID-19. Los resultados también ayudarán a planificar programas y servicios para los jóvenes. Con el fin de obtener la información más precisa sobre la salud de la juventud, nos gustaría que todos los estudiantes de las aulas seleccionadas participaran en la encuesta.

Esta encuesta fue creada en parte por los Centros para el Control y la Prevención de Enfermedades (CDC) y los Departamentos de Educación de Colorado (CDE), Servicios Humanos (CDHS), seguridad pública (CDPS) y Salud Pública y Medio Ambiente (CDPHE). Estos grupos proveen fondos al Campus Médico Anschutz de la Universidad de Colorado por conducir la Encuesta Healthy Kids Colorado en las escuelas bianualmente. Este proyecto ha sido aprobado por su distrito escolar y la Junta de Revisión Institucional Múltiple de Colorado (COMIRB).

Los estudiantes recibirán la encuesta en durante horario escolar (ya sea en persona o virtualmente) y recibirán instrucciones para contestar las preguntas o dejar la encuesta en blanco. Los estudiantes que no estén completando la encuesta harán otro trabajo escolar durante el tiempo de la encuesta. Le animamos a que discuta el tema con su hijo y comparta sus puntos de vista sobre su elección de participar.

Para obtener más información sobre el estudio y para ver una copia de la encuesta, visite nuestro sitio web en <http://www.healthykidscolo.org> o llame a la directora de la Encuesta Healthy Kids Colorado, Dra. Ashley Brooks-Russell, al 303-724-8437. Para preguntas sobre la aprobación del IRB, por favor comuníquese con COMIRB al 303-724-1055.

Por favor firme y devuelva este formulario a la escuela de su hijo dentro de las próximas dos semanas, si usted NO quiere que su hijo participe.

2021 Healthy Kids Colorado Survey: Middle School

This document includes all questions on the middle school version of the Healthy Kids Colorado Survey. When administered online, skip logic is used to streamline the survey experience.

STUDENT INSTRUCTIONS

You are about to take the Healthy Kids Colorado Survey. This survey is about your health and things that affect your health. Your answers are very important and will help your school, community, and state policy-makers improve health programs for people your age right here in Colorado.

This survey is completely anonymous, meaning the answers you give will be kept private. No one will know what you answer and your responses cannot be tied to your student login or device in any way.

Completing the survey is voluntary. You may choose not to answer some or all of the questions. If you are not comfortable answering a question, just leave it blank. Whether or not you answer the questions will not affect your grade in this class.

When you have completed your survey, please read or sit quietly to allow everyone to finish in silence. Thank you for your participation!
